

The Penefel Low Cost has been designed in 2016
for measuring the firmness of crisp fruits and materials – It is a statistic instrument

Many thanks for having acquired an Agrosta instrument

Your package contains :

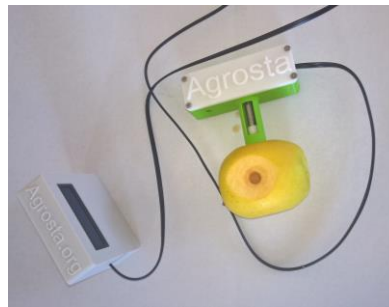

- A Box with the instrument itself
- A sensor connected to the instrument
- A certificate of conformity
- A manual
- 2 Plastic tips (8 & 11)
- Provided without batteries (3 AAA batteries required)

Tip choice :

- Tip of 11 (standard) : Used on **apples**... diameter 11.11 mm (7/16") – surface 0.97 cm²
- Tip of 8 (standard) : Used on **peaches, pears, kiwis, melon flesh**... diameter 7.94 mm (5/16") – surface 0.49 cm²

Main characteristics :

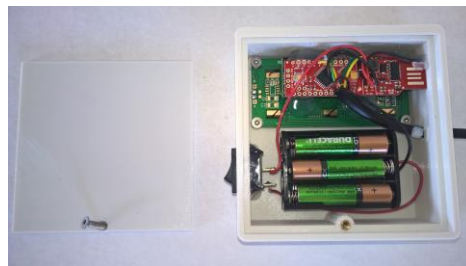

- Guarantee : 1 Year
- Precision : +/- 1 gram
- Resolution : 1 gram / 1milliLb
- Max pressure : 20 Kg
- Start measurements at 400 grams minimum

- Switch on the instrument by pressing on lateral button
- The screen is retro-lighted during 2 seconds, and then switches off
- You can start to measure
- Remove the skin of a fruit, and enter the tip till the abutment
- The screen is retro-lighted during 2 seconds, and displays the results :
 - o On first line, the average since you have switched on the device
 - o On second line, the result of current fruit, and the number of fruits tested till now
- Once the retro-light switches off, you can still read the results, but with no retro-light :

- This has been programmed by our engineers in order to upgrade battery capacity
- Don't forget to switch off your device once you have finished your batch
- For changing the batteries, remove the screw :

- You can use the device with a stand like shown on photo :
